Message from the Director

Dear Partners and Clients,

It is with great pleasure that I present the portfolio of SAAS, Sistemas e Tecnologias, LDA. Over more than a decade of activity in Angola, we have consistently sought to deliver technological solutions of excellence, tailored to the needs of each client and aligned with the highest international standards.

We believe that technology should be a driver of transformation and growth, and it is with this spirit that we have structured our offering, ranging from network and security infrastructure to cloud solutions, productivity, consulting and software development.

Our mission is clear, to connect people and strengthen businesses in Africa. To achieve this, we invest in strong partnerships with globally renowned

manufacturers, among others. These collaborations allow us to provide our clients not only with cutting edge products, but also with local technical support, proximity and trust.

At SAAS, we do not limit ourselves to supplying technology. We work side by side with our clients to understand their challenges, adapt solutions and ensure that each project delivers real and sustainable impact.

We invite everyone to explore, in the following pages, the diversity of services and solutions we place at your disposal. This portfolio reflects our commitment to supporting companies, institutions and governments in their growth journey, with security, innovation and efficiency.

Warm greetings.

Alexandra França

CCO

INDICATORS AND DIFFERENTIATORS

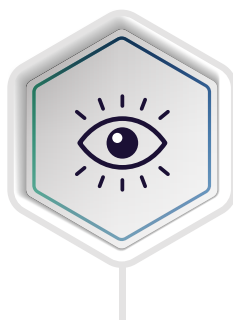

Portfolio with +125 world leading technology brands

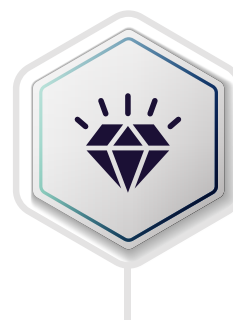

MISSION

To deliver innovative, high quality technological solutions, helping our clients achieve their objectives.

VISION

To be a reference in technology solutions in Angola and in the international market, standing out for innovation and excellence in the services provided.

VALUES

Innovation
Commitment to the Client
Ethics and Transparency

WHO WE ARE

SAAS – SISTEMAS E TECNOLOGIAS, LDA

is an Angolan company with more than a decade of experience in the information technology sector.

We operate as a technology hub and strategic partner, helping organizations transform their processes through cloud solutions, cybersecurity, system integration and business automation.

Headquartered in Luanda and present across critical sectors such as oil and gas, banking, government, aviation and logistics, we provide consulting, implementation and specialized support tailored to the African reality.

OUR FOCUS

Our focus is to deliver technological infrastructure solutions, vertical business solutions and the licensing of global technologies, acting as a representative of major international manufacturers in Angola.

OUR MAIN AREAS OF OPERATION ARE:

Technological Infrastructure

- Structured cabling and networks, data centers, hybrid cloud and virtualization.
- Implementation and support for solutions from Cisco, Huawei, HP, Dell and other leading manufacturers.

VoIP and Unified Communications

- Voice, video and collaboration solutions with Zoom, 3CX, Microsoft Teams and PBX integration.

Integration and Licensing

- ERP systems, payment gateways and national fiscal systems.
- Official licensing and support for Microsoft, Adobe, Autodesk, Veeam, Riverbed, among others.

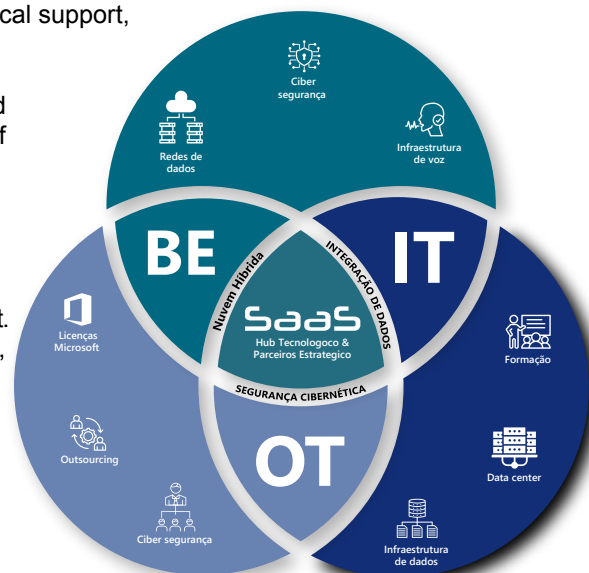

IT Outsourcing and Project Management

- IT outsourcing services, technical support, specialized management and advanced technical training.
- Implementation and end to end management and monitoring of technological projects.

Cybersecurity & IA (AI)

- Firewalls, proxies, corporate antivirus and access management.
- Leading solutions from Palo Alto, Fortinet, ESET, Kaspersky, Huawei and next generation cybersecurity technologies.

INFRASTRUCTURE & DATA CENTER

COLLABORATION & PRODUCTIVITY

UNIFIED COMMUNICATIONS (UC)

AUDIO VISUAL & VIDEO COLLABORATION

DIGITAL SECURITY & CYBERSECURITY

DIGITAL SECURITY & ALOT (PHYSICAL + AI)

OUR PORTFOLIO

TECHNOLOGICAL INFRASTRUCTURE

We support companies across different sectors in modernizing and integrating their systems, ensuring high performance, security, scalability and continuous availability.

OUR OFFERINGS INCLUDE:

STRUCTURED NETWORKS (LAN, WAN, WI FI)

Design, installation and maintenance of structured cabling Cat6A and Cat7, fiber optics, ODF, patch panels and high density wireless connectivity solutions.

DATA CENTER AND VIRTUALIZATION

Implementation of modern data centers, physical and virtual servers, SAN and NAS, hyperconverged solutions, load balancing and disaster recovery.

SECURITY AND FIREWALLS

Advanced protection with market leading solutions (Fortinet, Palo Alto, Kaspersky), network segmentation, secure VPNs, SD WAN and centralized threat management.

CLOUD AND HYBRID

Integration of on premises environments with public and private cloud (Azure, AWS, Google Cloud), cloud backup, elastic storage and high availability solutions.

COMMUNICATIONS AND VOICE

Corporate IP telephony solutions (3CX, Yealink, Cisco), omnichannel integration, IVR, call recording and analytical reporting to improve customer experience.

POWER AND ENVIRONMENT

Supply and installation of UPS systems, electrical redundancy solutions and climate control to ensure maximum availability of critical systems.

We combine specialized consulting, equipment supply, implementation and ongoing support, helping each client turn their technological infrastructure into a competitive advantage.

VOIP AND UNIFIED COMMUNICATIONS

We help companies transform the way they communicate through VoIP and Unified Communications solutions that integrate voice, video, chat, email and collaboration into a single digital ecosystem.

Our solutions enable organizations to reduce costs, increase mobility, improve productivity and ensure secure and efficient communication experiences.

OUR OFFERINGS INCLUDE:

CORPORATE IP TELEPHONY

Implementation of on premises or cloud based PBX systems (3CX, Cisco, IPBrick), with integration to IP phones, softphones and mobile devices.

COLLABORATION PLATFORM INTEGRATION

Integration with Microsoft Teams, Zoom, Google Meet and others to ensure seamless communications in any environment.

CONTACT CENTERS AND OMNICHANNEL

End to end solutions with IVR, automatic call distribution (ACD), analytical reporting, call recording and CRM integration.

MOBILITY AND REMOTE WORK

Secure access to corporate extensions from anywhere through softphones, mobile applications and dedicated VPNs.

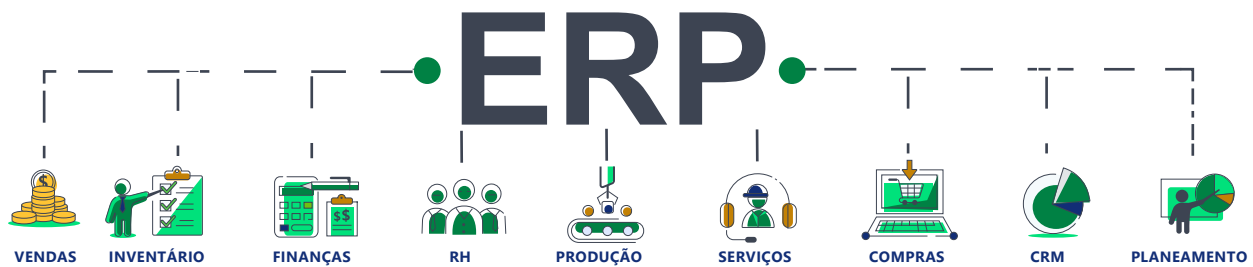

DEVICE PROVISIONING

Fast provisioning of new users and devices, including desk phones, video conferencing systems, headsets and advanced extensions.

With our VoIP and Unified Communications solutions, companies gain a more collaborative, integrated and future ready work environment, allowing teams and clients to stay connected at all times.

INTEGRATIONS AND LICENSING

At SAAS, we believe that technology only delivers its true value when it works in an integrated manner and in full compliance with the appropriate licensing models. For this reason, we have developed a comprehensive approach that covers consulting, supply, implementation and ongoing management of software and hardware solutions, ensuring that our clients always have access to the best tools in a secure, legal and scalable way.

WHAT WE OFFER

MULTIPLATFORM INTEGRATIONS

We connect critical systems, enterprise applications (SAP, PRIMAVERA, CEGID, PHC, O365, Salesforce, ERPs, CRMs, among others) and hybrid or cloud infrastructures to ensure efficient information flows and seamless communication across all technological environments.

FLEXIBLE AND COMPLIANT LICENSING

We support organizations in acquiring and managing official licenses from global vendors such as Microsoft, Adobe, Cisco, Kaspersky, Fortinet, Zoom, Dell and HPE, among others. We offer licensing models tailored to the size and needs of each organization, including perpetual licenses, monthly or annual subscriptions, volume licensing and special programs for specific sectors.

LICENSE LIFECYCLE AND COMPLIANCE MANAGEMENT

We monitor and manage the entire license lifecycle, reducing audit risks, ensuring regular updates and optimizing licensing costs.

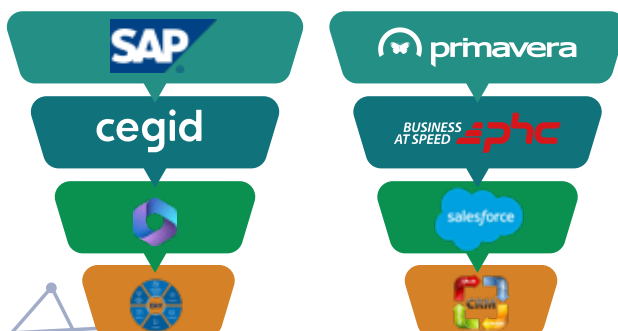

PROPRIETARY SAAS SOLUTIONS

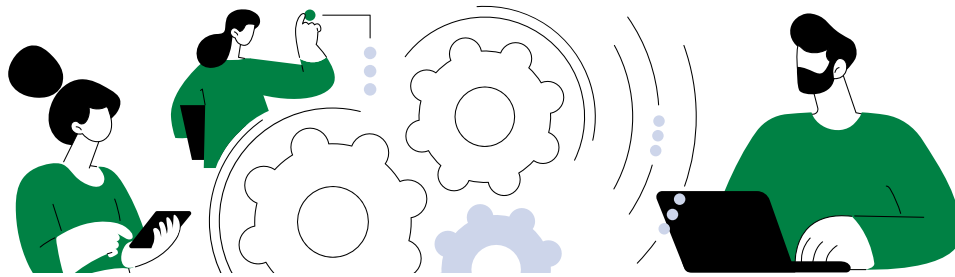

In addition to representing major manufacturers, we also provide our own solutions such as SAAS One365 (Billing and POS), SAAS Databox (Backup and Disaster Recovery) and SAAS Connect (MPLS, SD WAN and VPN).

KEY BENEFITS

- o Cost reduction through optimized licensing models
- o Legal and technological security by using only genuine software
- o Full system integration
- o Local technical support

IT OUTSOURCING AND PROJECT MANAGEMENT

WE TRANSFORM CHALLENGES INTO SUSTAINABLE TECHNOLOGICAL SOLUTIONS

In the digital era, operational efficiency and agility in project execution are essential to business success. Our approach to IT Outsourcing and Project Management allows companies to focus on their core business while we take care of technology.

WHAT WE OFFER

STRATEGIC CONSULTING

In depth analysis of the client's needs, definition of clear goals and alignment with business objectives.

TECHNICAL TEAM OUTSOURCING

We provide qualified professionals across multiple IT areas, from technical support to software development, with flexible and scalable engagement models.

END TO END PROJECT MANAGEMENT

Planning, execution, monitoring and delivery of technological projects using agile methodologies and a strong focus on results.

SECURITY AND COMPLIANCE

We ensure that all processes comply with international standards for security and data protection.

BENEFITS FOR YOUR BUSINESS

- Reduction of operational costs
- Access to specialized talent
- Faster delivery of solutions
- Full focus on strategic growth
- Mitigation of technological risks

AREAS OF OPERATION

- IT Infrastructure • Cloud and DevOps • Cybersecurity • Software Development
- Technical Support and Helpdesk • Artificial Intelligence and Automation

Link Aggregation Services (WAN Bonding)

In the digital era, connectivity is fundamental to the success of any organization. SAAS – Sistemas e Tecnologias, LDA offers Link Aggregation (WAN Bonding) solutions designed to optimize the performance of your network links, increasing speed, redundancy, and resilience of internet connections.

WHAT IS LINK AGGREGATION??

Link Aggregation, also known as WAN Bonding, is a technology that combines multiple internet connections—whether DSL, fiber, LTE, or satellite—to create a single, more robust connection. This results in:

BENEFITS FOR YOUR COMPANY

Flexibility:

Scalable solution adaptable to the specific needs of your company.

Security:

Data encryption and secure traffic distribution.

Uninterrupted Connectivity:

Elimination of critical failures through failover

Superior Performance:

Better experience for real-time applications such as video conferences and VoIP.

Link Aggregation Services (WAN Bonding)

CUSTOMIZED SOLUTIONS

At SAAS, we implement link aggregation solutions tailored to your environment, ensuring seamless integration with your existing systems. Our service includes:

- Detailed analysis of network requirements.
- Configuration and implementation of WAN bonding equipment.
- Continuous monitoring to ensure optimal performance.
- Specialized technical support.

RECOMMENDED EQUIPMENT FOR LINK AGGREGATION

To guarantee maximum performance and reliability in link aggregation, we work with equipment from globally recognized manufacturers, known for their durability, technical support, and efficiency.

RECOMMENDED BRANDS AND MODELS

1. Peplink Balance Series

- **Models:** Balance 20, Balance 310X, Balance 580X
- **Characteristics:**

- Aggregation of up to 13 WAN links.
- Automatic failover and advanced load balancing.
- High performance VPN support.
- Centralized management with InControl2.

Link Aggregation Services (WAN Bonding)

2. Cisco Meraki MX Series

- **Models:** MX67, MX100, MX250
- **Characteristics:**

- Integrated security with firewall and IDS/IPS.
- Cloud-based management.
- Aggregation of multiple links with intelligent load balancing.
- High scalability for businesses of various sizes.

3. Ubiquiti EdgeRouter

- **Models:** EdgeRouter 6P, EdgeRouter Pro
- **Characteristics**

- High-capacity processing (up to 2 million packets per second).
- Advanced load balancing and failover configuration.
- Integration with LTE networks for redundancy.
- Excellent cost-benefit ratio.

4. Mushroom Networks

- **Models:** Truffle Lite, Truffle 410, Truffle 7000
- **Characteristics:**

- Aggregation of up to 8 WAN links simultaneously.
- Optimization for applications such as VoIP and video.
- Superior performance in environments with links of different technologies.

Link Aggregation Services (WAN Bonding)

ACCESSORIES AND COMPLEMENTARY SUPPORT

In addition to routers and link aggregation devices, we offer support in the configuration of:

- **Managed Switches:** Cisco Catalyst, Aruba Instant On 1930.
- **LTE/5G Modems:** Netgear Nighthawk M6, Huawei B818.
- **Mobile Network Antennas:** Poynting XPOL-2, Panorama Antennas 5G.
- **Power Management:** Nobreak APC Smart-UPS, Eaton 9SX.

CONFIGURATION AND INTEGRATION SERVICE

Our specialized team performs:

- Installation and configuration of equipment.
- Performance tests to verify link aggregation.
- Training for your IT team.
- Preventive and corrective maintenance.
